

06 Safeguarding children, young people and vulnerable adults procedures

06.9 E-safety (including all electronic devices with internet capacity)

Our internet access is restricted and firewalled via Beech Green School.

Online Safety

It is important that children and young people receive consistent messages about the safe use of technology and are able to recognise and manage the risks posed in both the real and the virtual world.

Terms such as 'e-safety', 'online', 'communication technologies' and 'digital technologies' refer to fixed and mobile technologies that adults and children may encounter, now and in the future, which allow them access to content and communications that could raise issues or pose risks. The issues are:

Content – being exposed to illegal, inappropriate or harmful material

Contact – being subjected to harmful online interaction with other users

Conduct – personal online behaviour that increases the likelihood of, or causes, harm

I.C.T Equipment

- The setting manager ensures that all computers have up-to-date virus protection installed.
- Tablets are only used for the purposes of observation, assessment and planning and to take photographs for individual children's learning journeys. We also extend interests via adult led searches through google.
- Staff tablets are pin code protected.

Internet access

- Children never have unsupervised access to the internet.
- Only reputable sites with a focus on early learning are used (e.g. CBeebies).
- Children are taught the following stay safe principles in an age appropriate way:
 - only go online with a grown up
 - be kind online **and** keep information about me safely
 - only press buttons on the internet to things I understand
 - tell a grown up if something makes me unhappy on the internet

- Staff support children's resilience in relation to issues they may face online, and address issues such as staying safe, appropriate friendships, asking for help if unsure, not keeping secrets as part of social and emotional development in age-appropriate ways.
- All computers for use by children are sited in an area clearly visible to staff.
- Staff report any suspicious or offensive material, including material which may incite racism, bullying or discrimination to the Internet Watch Foundation at www.iwf.org.uk.

The setting manager ensures staff have access to age-appropriate resources to enable them to assist children to use the internet safely.

Personal mobile phones – staff and visitors (includes internet enabled devices)

- Personal mobile phones are kept in a cupboard/office with the exception of Managers phones to enable Social Media promotional photographs to be taken within session. (No Nursery equipment is able to do this due to blanket safety across social media networks. When not in use for this purpose the phone will be in a cupboard/office. Photographs on the device are deleted with immediate effect when distributed for their purpose on social media)
- To enable music and child led activities such as Yoga and educational 'add ons' e.g. Numberblocks, staff will connect their device to the speaker/projector and then place it back in the cupboard/office/kitchen area.
- Staff with Type 1 Diabetes need their mobile phone accessible at all times due to the scanning app only being available on mobile devices now. Phone to be used ONLY for the medical purpose set out in this point during session times, unless permission has been given (see below point).
- In an emergency, personal mobile phones may be used away from the children with permission.
- Staff ensure that contact details of the setting are known to family and people who may need to contact them in an emergency.
- Parents and visitors do not use their mobile phones on the premises. There is an exception if a visitor's company/organisation operates a policy that requires contact with their office periodically throughout the day. Visitors are advised of a private space where they can use their mobile.

Cameras and videos

- Members of staff do not bring their own cameras or video recorders to the setting.
- Photographs/recordings of children are only taken for valid reasons, e.g. to record learning and development, or for displays, and for social media purposes.
- Camera and video use is monitored by the setting managers.

- Where parents request permission to photograph or record their own children at special events, Parents are told they do not have a right to photograph or upload photos of anyone else's children onto social media platforms.
- Photographs/recordings of children are only made if relevant permissions are in place.
- If photographs are used for publicity, parental consent is gained and safeguarding risks minimised, e.g. children may be identified if photographed in a sweatshirt with the name of their setting on it.

Cyber Bullying

If staff become aware that a child is the victim of cyber-bullying at home or elsewhere, they discuss this with the parents and refer them to help, such as: NSPCC Tel: 0808 800 5000 www.nspcc.org.uk or ChildLine Tel: 0800 1111 www.childline.org.uk

Use of social media

Staff are expected to:

- understand how to manage their security settings to ensure that their information is only available to people they choose to share information with
- ensure the organisation is not negatively affected by their actions and do not name the setting
- are aware that comments or photographs online may be accessible to anyone and should use their judgement before posting
- are aware that images may still be accessed by others and a permanent record of them made, for example, by taking a screen shot of the image with a mobile phone
- observe confidentiality and refrain from discussing any issues relating to work
- not share information they would not want children, parents or colleagues to view
- not accept service users, children and parents as friends, unless already personally known to Staff, as it is a breach of professional conduct
- report any concerns or breaches to the DSL in their setting
- not engage in personal communication, including on social networking sites, with children and parents with whom they act in a professional capacity. There may be occasions when the practitioner and family are friendly prior to the child coming to the setting. In this case information is shared with the manager and a risk assessment and agreement in relation to boundaries are agreed.

Use/distribution of inappropriate images

- Staff are aware that it is an offence to distribute indecent images and that it is an offence to groom children online. In the event of a concern that a colleague is behaving inappropriately, staff advise the designated person who follow procedure [06.2] Allegations against staff, volunteers or agency staff.
